

Did you ever think about an international project where you ...

- collaborate with another Teacher Training Institute or college abroad?
- take your students abroad without travelling?
- invite a college abroad online in your lessons?
- gather educational materials on a European level?
- train education majors to do international projects?

Then eTwinning is your answer!

With eTwinning, you give your students a look beyond the border

They come in contact with peers in other countries and learn about each other's language and culture. Your students can work together on various themes such as media literacy and climate. International cooperation gives existing lessons an extra dimension, and that is the great strength of eTwinning.

Work together on a European platform

One of the essential elements of eTwinning is collaboration among teachers, students, schools, parents, and local authorities. In eTwinning teachers work together and organise activities for their students. They have an active role, interact, investigate, make decisions, respect each other and learn 21st-century skills.

eTwinning is for primary, secondary, vocational and teacher training teachers in Europe

eTwinning offers a platform for staff (teachers, headteachers, librarians, etc.), working in a school in one of the European countries involved, to communicate, collaborate, develop projects, share and, in short, feel and be part of the most exciting learning community in Europe. eTwinning is co-funded by the Erasmus+, the European programme for Education, Training, Youth and Sport.

Take 5 minutes to watch [this](#) YouTube video, and you will be enthusiastic!
